Contract Sofa Bed Manufacturers

The Mattress:

The Contract Sofa Bed mattress is manufactured in the UK by a reputable National Bed Federation Member. It is constructed using a Bonnell sprung 13.5 gauge frame body which gives a medium firmness. In reality, sleepers are guaranteed a comfortable night's rest with **Bonnell Springs**. Generally they are larger than those featured in pocket sprung mattresses, and the term 'open coil' refers to the fact that the **springs** are linked together in a wire frame for added support.

Bonnell Sprung Example

It is a full length mattress and is a generous 14 cms in depth. The mattress meets current FR regulations and is manufactured in **3 sizes** to fit the bed mechanisms. Our mattress comes with a full **2 Year Replacement Guarantee** against manufacturing defects. This mattress significantly contributes to the guest(s) having good night's sleep. Replacement mattresses are readily available.
